SUMMARY

Front-end Web and iOS Developer with a background in Sound Design, from Tec de Monterrey University. Effective at combining rational and objective analysis with creative and inventive solutions to develop beautiful and efficient user-friendly applications. Known for a strong wit and consciousness about the importance of teamwork and detail no matter the complexity of the project. Motivated by visible results, always trying to combine a good design within a great user experience.

TECHNICAL SKILLS

Programming languages: Java, SuperCollider, Swift, JavaScript, C#, CSS, HTML, SQL.

Technologies: Node.js, Express, React.js, jQuery, Materialize, Ant Design, Bootstrap, Xcode, Wwise, Protools, Adobe Premiere.

Languages: Spanish, English.

PROJECTS

MI FONDITA EXPRESS | **GitHub repo:** github.com/alfa9317/WDBFinalProject | **Deployed project:** mi-fondita-express.herokuapp.com

Project leader and Front-end developer of a web application built with React.js, Express, Node.js, Materialize and Ant Design. It is a platform developed to offer a cheap and healthy solution to food delivery services, where the customer would be able to order from a daily menu and receive the order between a certain range of time.

YOUTIFY | **GitHub repo:** github.com/alecvipa/Youtify | **Deployed project:** alecvipa.github.io/Youtify

Front-end developer and API manager of an application developed with HTML, CSS, JavaScript, jQuery and Materialize, whose main purpose is to translate your playlists in Spotify as YouTube videos.

RELEVANT EXPERIENCE

iOS Developer

ND - Negocios Digitales

April 2019 – December 2019

Mexico City, CDMX

- iOS Development representative at ND, involved in planning and performing technical designs for the UI front-end of the apps.
- Implementation of web services inside the apps for communication with databases.
- Work closely with the technical leader and designer to define a rich iOS experience for the user.
- Front-end developer and designer of an iOS application, built using Swift as the programming language and Xcode as the development environment. The app's purpose was to administrate/control the activities and accesses of a residential property.

Volunteer iOS Developer

Ednica

May 2016

Mexico City, CDMX

Developer of an iOS app for a non-profit organization called "Ednica". The app's purpose was to display Ednica's organizational information and to take, save and share custom pictures into social media. Pictures were customized using the different Ednica's frame designs.
